

Care & Maintenance of Brodart Furniture

The finish on your Brodart furniture is of high quality, but regular cleaning will improve its longevity and help it remain beautiful and functional for years.

The process described here will work for wood, high-pressure laminate, and thermally-fused laminate products.

For proper cleaning, you will need the following:

- 3 soft cloths
- Mild hand dishwashing soap
- Cold water

Mix the cleaning solution by combining 1 tablespoon of the mild dish soap with 6¼ cups of cold water. It is important to not use soaps with strong chemicals such as ammonia, degreasers, silicone, or bleach, as these products will harm the finish of your furniture.

Dampen a soft cloth with the cleaning solution and rub the surface in the direction of the grain (if applicable).

Next, use another soft cloth dampened with plain cold water to remove any soap or residue from the furniture.

Finally, use a dry cloth to dry the furniture by working in the direction of the grain (if applicable to the chosen finish). It is important to dry the surface completely in order to protect the wood from warping.

If stains or residue remain on the surfaces after cleaning, contact Brodart for additional cleaning instructions.
